

HOW to Install Downloader App for Sideloading on Firestick/Fire TV and Android

The Downloader app is developed and owned by [AFTVnews](https://www.aftvnews.com) and has been accessed by millions of cord-cutters across the world.

If you own any streaming device that runs the Android operating system (OS) then you can install the Downloader app onto your device for sideloading capabilities.

Popular streaming devices that run Android OS include the following:

- Amazon Firestick (all models)
- Fire TV, Fire TV Cube, and all Fire TV devices
- NVIDIA Shield (all variations)

- • Chromecast with Google TV
- Android Phones & Tablets
- Generic Android TV Boxes – X96 Max, T95q, Beelink GT-King, and more
- MECOOL Boxes
- Tivo Stream 4K
- Raspberry Pi
- Windows PC and Mac (via Android emulator)

Note: Roku devices run their own operating system and are **NOT** compatible with the Downloader app.

We recommend using one of the Android OS devices listed above for a better overall streaming experience.

Below we have included step-by-step screenshot instructions for installing Downloader on each type of Android operating system.

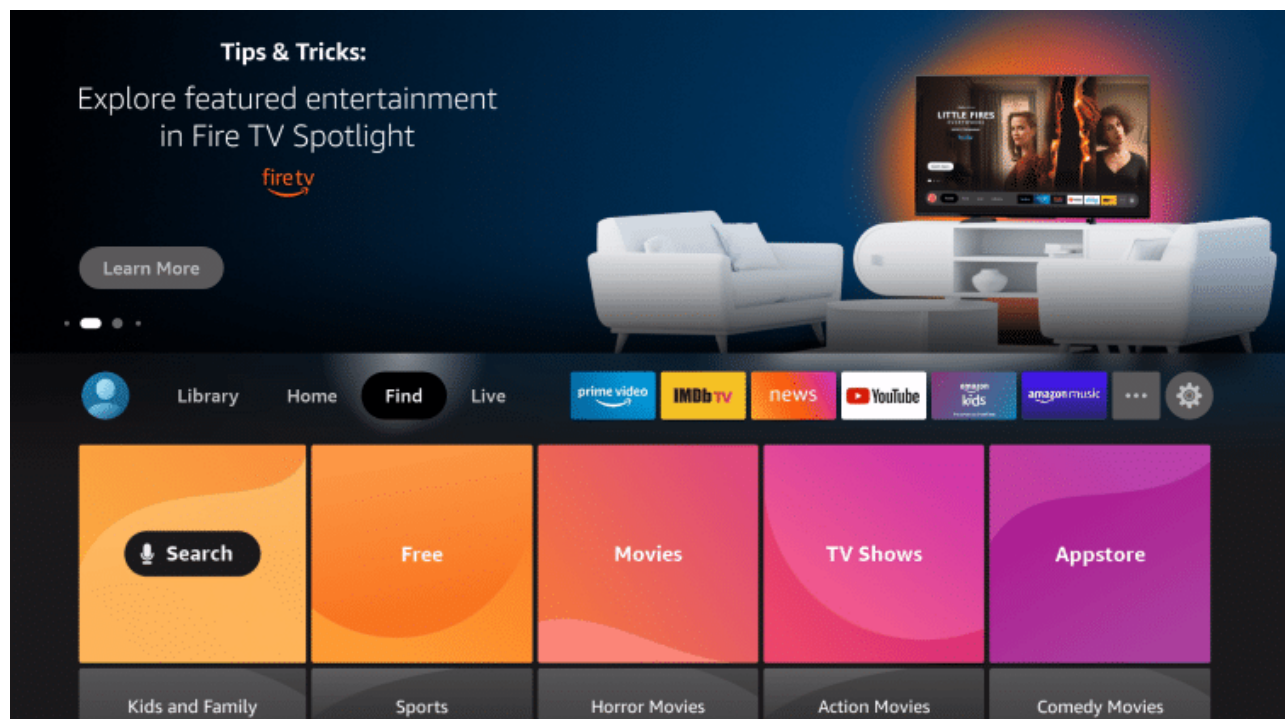

How To Sideload with Downloader on Firestick/Fire TV

The following process is for those using the Amazon Firestick, Fire TV, Fire TV Cube, or any Fire TV device.

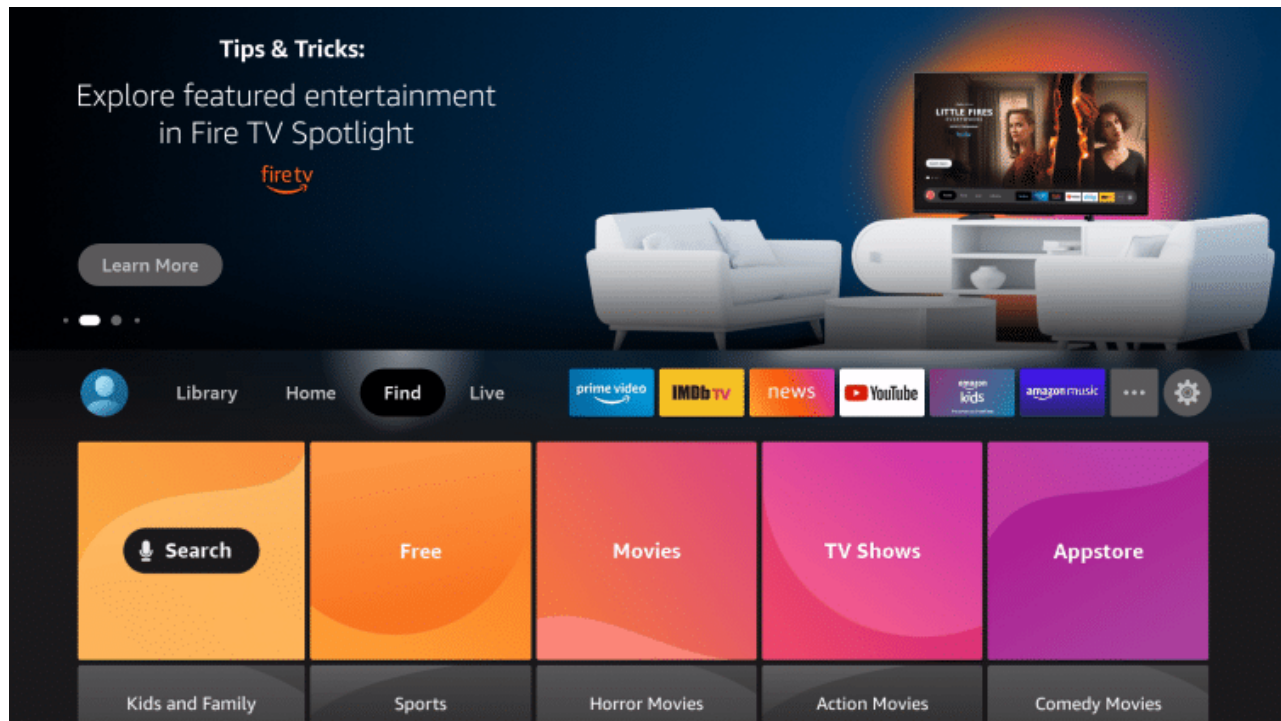

New Firestick Interface

These instructions show how to install Downloader on the new Firestick interface.

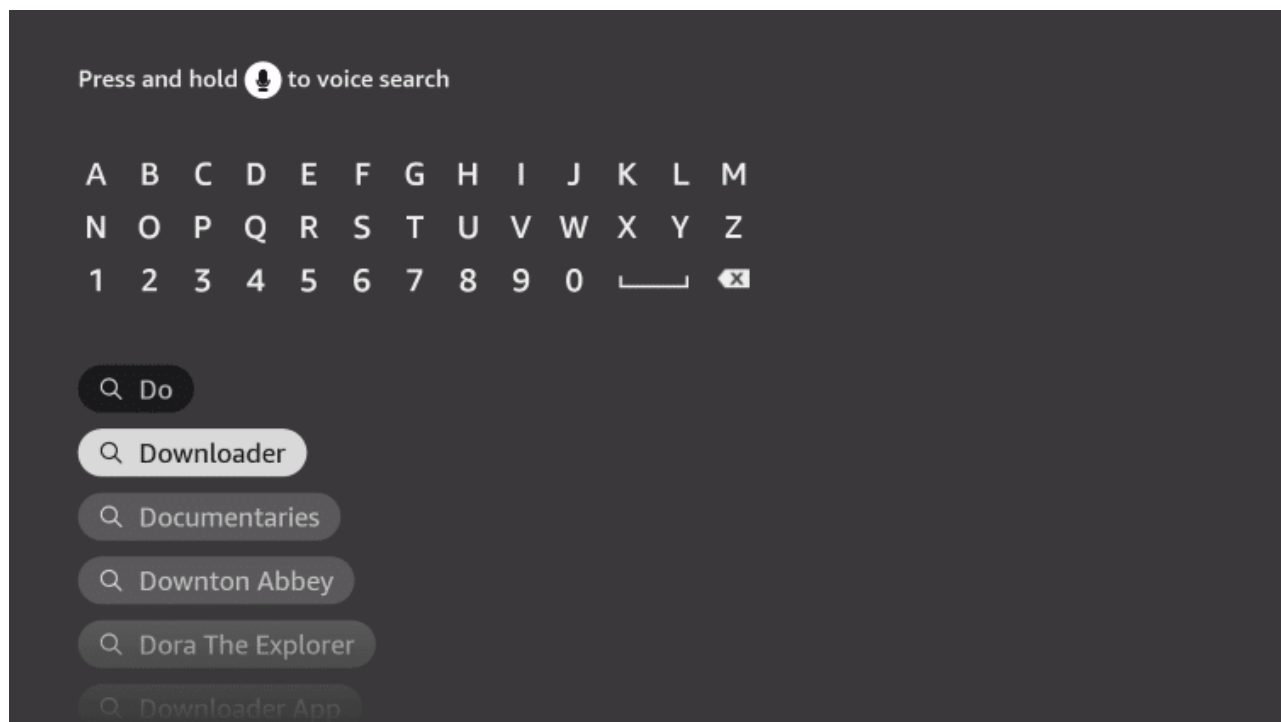

1. From the home screen of your device, hover over the Find option.

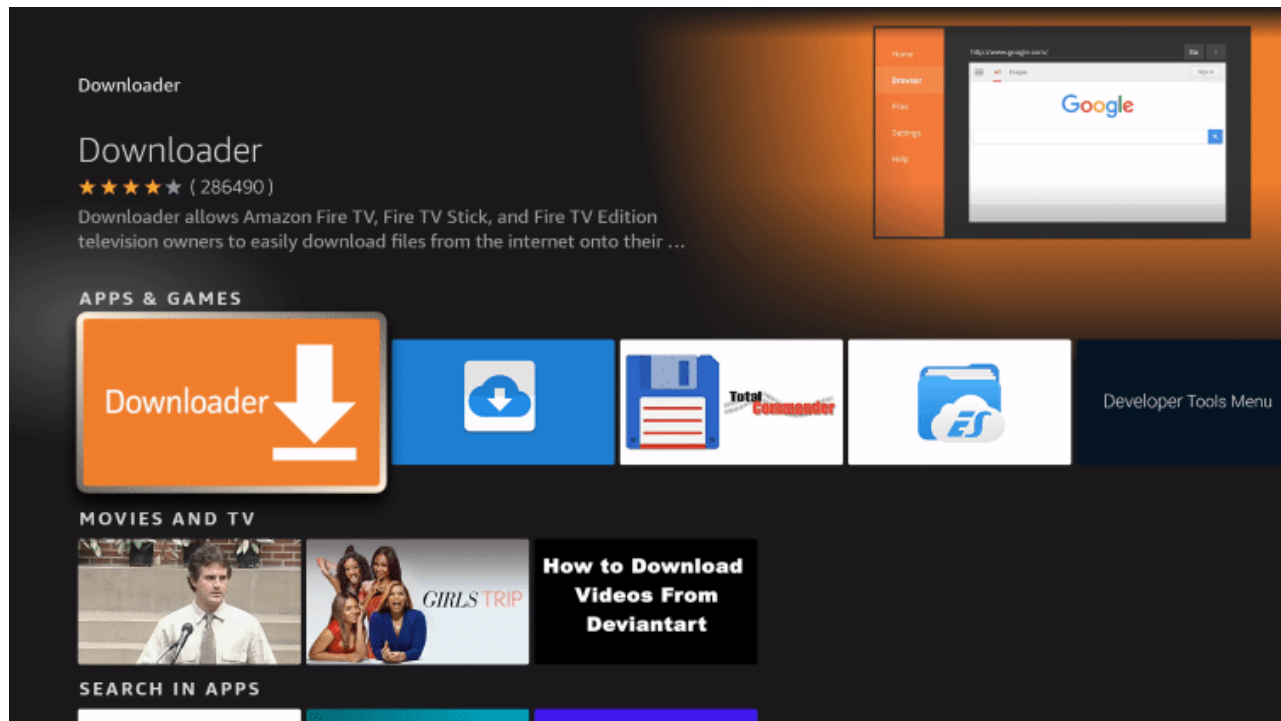

2. Click Search.

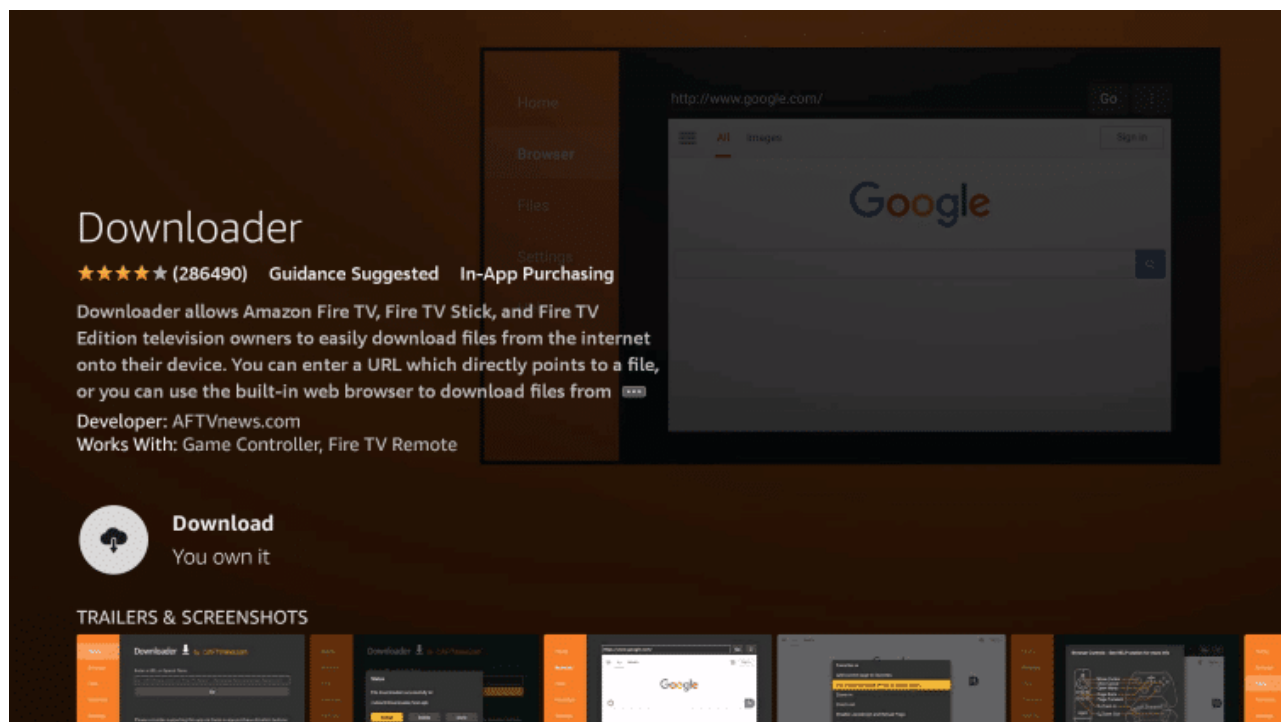

3. Search for and select Downloader.

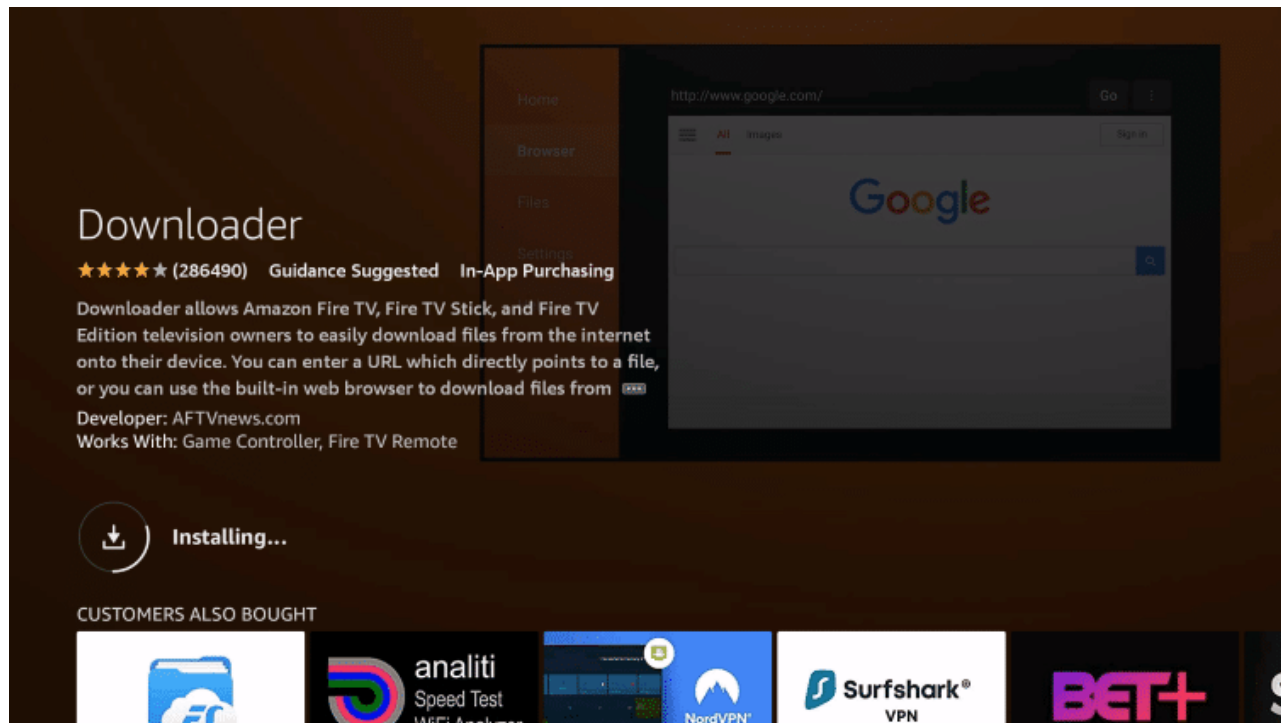

4. Choose the Downloader app.

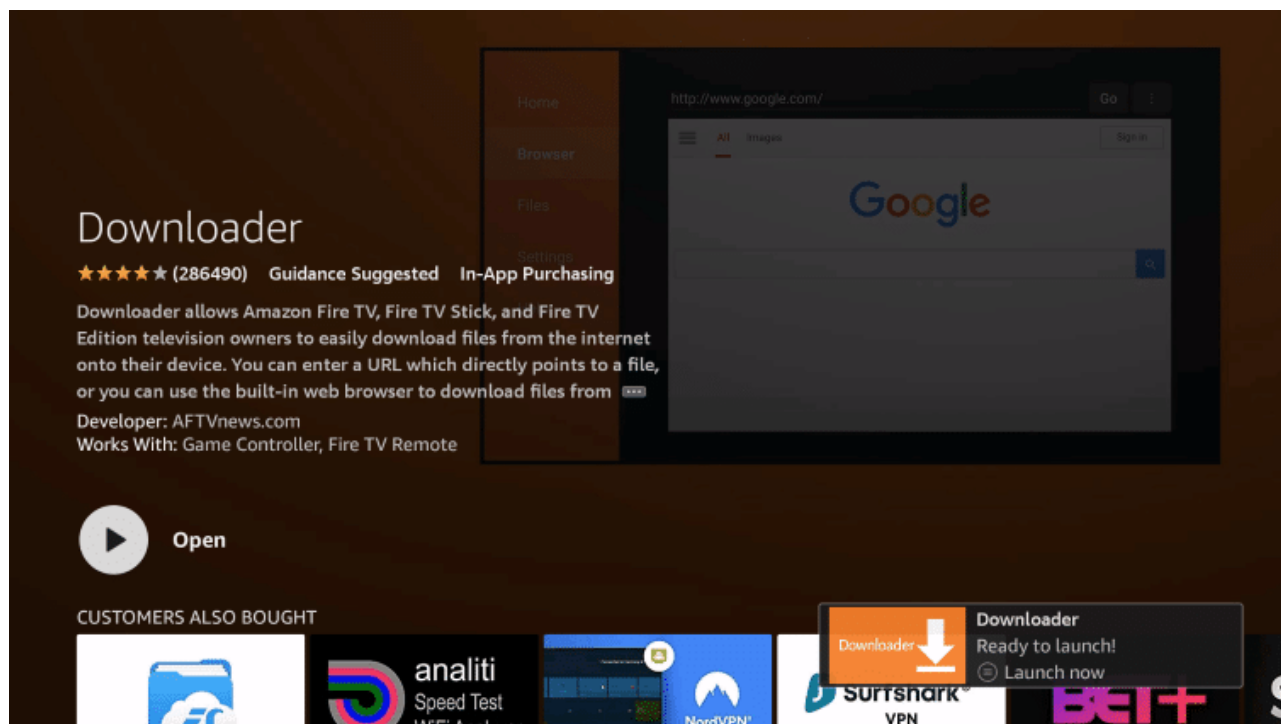

5. Click Download.

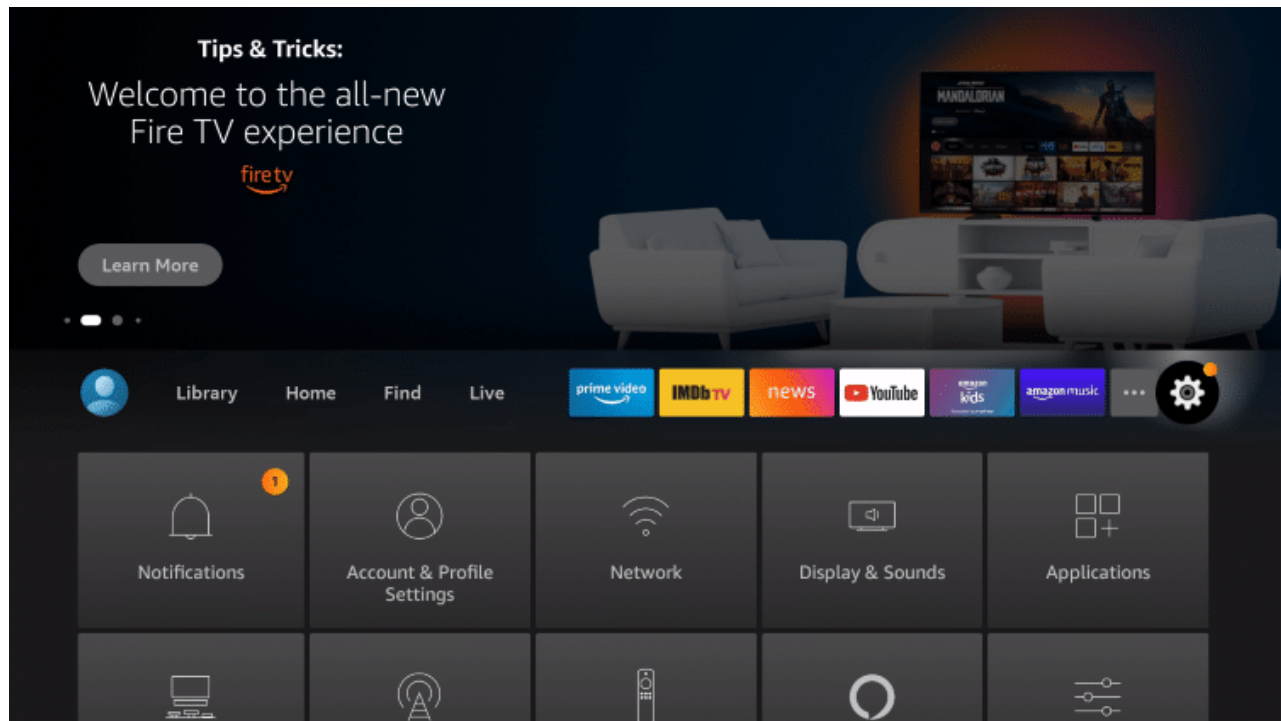

6. Wait for the app to install.

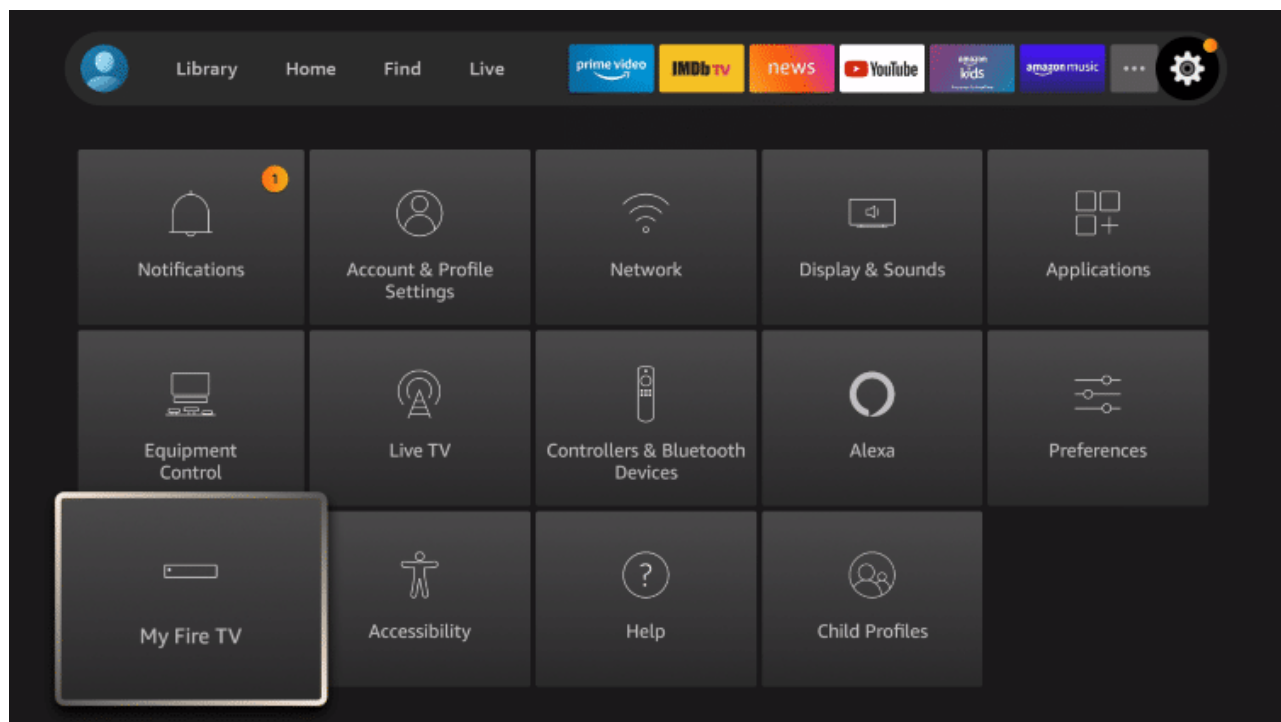

7. Once the app finishes installing click Open.

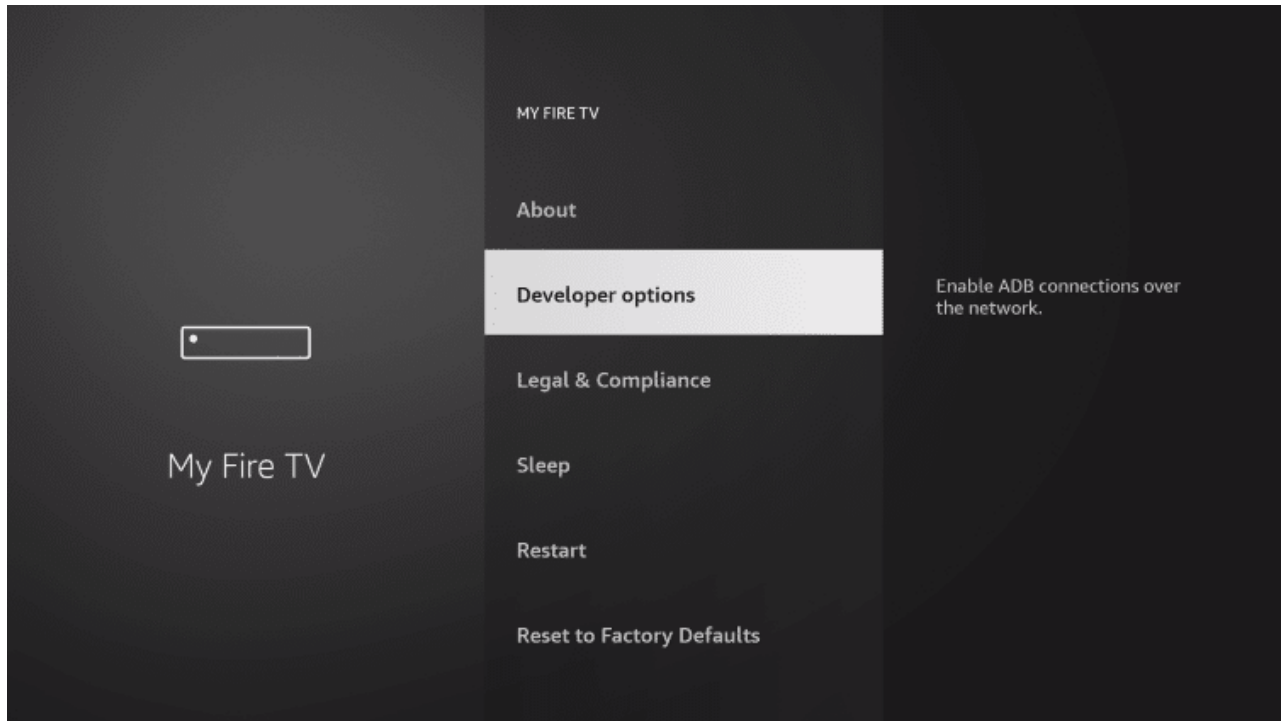

8. Return to the home screen and open SETTINGS

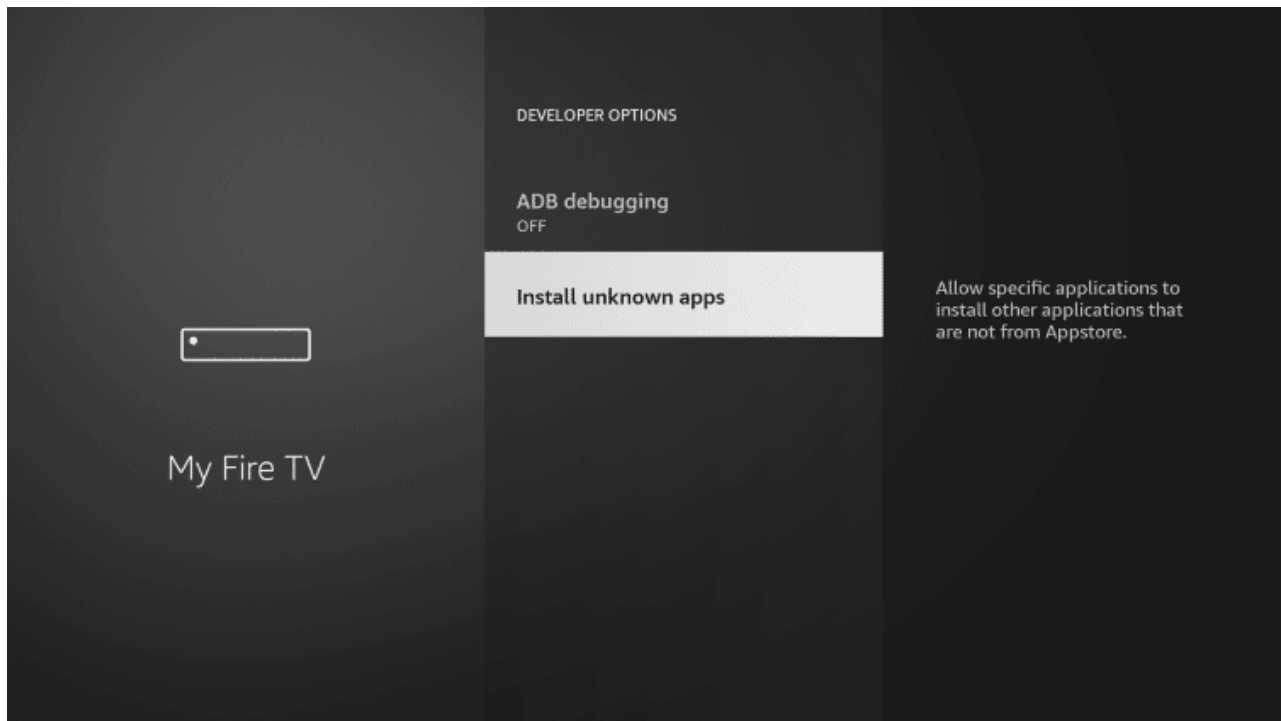

9. Click My Fire TV.

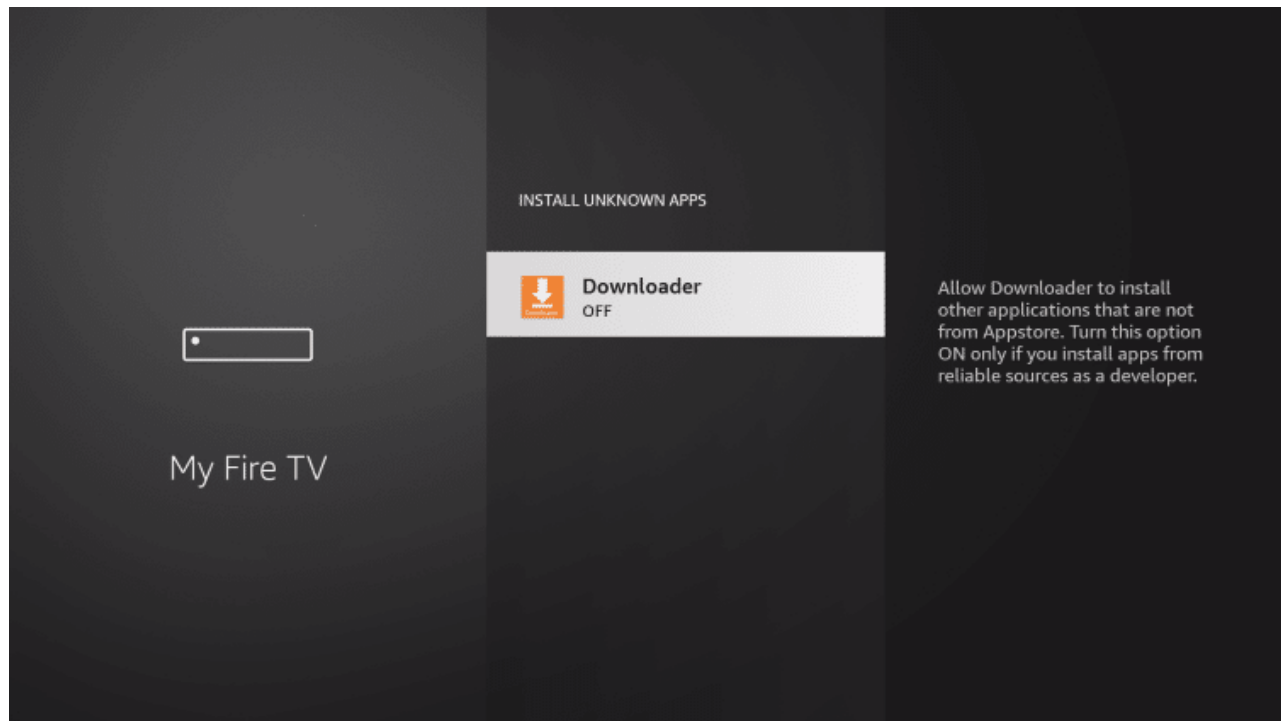

10. Choose Developer options.

11. Click Install unknown apps.

12. Find the Downloader app and click

13. This will turn Unknown Sources to On for the Downloader app. This will enable side-loading on your device.
