How to setup IPTV on Dreamlink T1-T2 box with the DOL2?

The Dreamlink T1 and T2 are devices that grant access to **IPTV channels**. They include a user interface based on the Stalker Middleware, an interface that is intended to convert these online channels into a menu from which you can simply select which channel you require to watch.

Basically, these merchandises make it simpler for you to see the numerous channels that are on offer and pick whichever one catches your imagination. The user interface also includes a web browser, video player, and a mixture of other apps. Softwares you need for watching IPTV

How to add IPTV channels to Dreamlink

In order to add channels to your dreamlink device, follow the below steps.

Step 1: From the main page, go to "My Apps".

Note, If the DreamOnline (**DOL2**) app is not in the My apps folder go to the Market folder, find DreamOnline (**DOL2**) and install it. After that, it will appear in the My apps folder/

Step 3: Now select "Edit Service" and then click on "Click Edit".Important: Be sure you register on (Server Operator Homepage) with your right MAC Address (if necessary).

	M Regis	ac 00:1A:79: <mark>AB:CD:EF</mark> ter with Server Operator	
+ Edit Service	Service Nickname	+ Edit Service	
+ Edit Service	Service URL	Service URL	
F LUIL SELVICE	Certificate	NO	
+ Edit Service	User ID	User ID	
	User Password	User Password	
< + Edit Service	ę 🗖	Edit	
+ Edit Service		< LIST	OK EDIT SERVICE

Step 4: Enter Service Nickname (Any name).

		EDIT S	SERVICE			
	Service Nickname Service URL	Anything				Remote control
< + Edit Service	Certificate User ID User Password					OK Sclect
	ок			Canc	el	LIST OK EDIT SERVIC
